Dear Sir / Madam,

I am looking for position of HQSE superintendent, Technical Superintendent, DPA or any relevant position in your good company.

My background has given me the hands-on experience in all fields of office and shipboard operations that would contribute to your organization's goals and objectives.

A key benefit that I can bring your organization includes a practical approach to shipboard and office operations and safety with a constant supervision over control and finding a balance between safety on board and speed of shipboard operations, repairs without diminishing the quality and benefit for the company.

These achievements are derived from the common team job: office - vessel, the willingness to take responsibility in critical or emergency situations when it depends on the time of taking decision, on the timely and skillful motivation of involved personnel, from my exceptional interpersonal and communication skills, strong attention to details, and unparalleled work ethic.

As I have a Russian citizenship and green card for living and work in EC, I do not need any visas (it means without any delay) to go immediately to any vessel in any European Country, Russia, Ukraine, Turkey, Georgia to solve most problems with crew, cargo, loading / discharging operations, inspections and so on.

My position precedes me to hear, understand and analyze ideas of director or ship-owner and thoughts on creating a safe and productive work.

If your company policy requires work in another country I am ready to go where it will be need.

I believe that my experience in position of Superintendent and DPA over 10 years, my experience as Chief Mate on board the vessels have required skills and qualification as per your needs.

I am available for interview at any time and looking forward to hearing from you.
